

PROSTATE CANCER TALKS

Dr. Klaassen was born and raised in Canada, earning his undergraduate degree in Molecular Biology and Biochemistry at Simon Fraser University. He then attended medical school at St. George's University in Grenada followed by completion of his Urology residency at the Medical College of Georgia in Augusta, Georgia.

After residency he completed a two-year Society of Urologic Oncology fellowship at the Princess Margaret Cancer Center in Toronto, Canada. While in Toronto, he also earned a Master's of Science degree in Clinical Epidemiology and Health Care Research. His current practice at the Georgia Cancer Center includes all aspects of genitourinary cancer with a special interest in kidney and testicular cancer. He is the residency program and clinical urological research director. Dr. Klaassen's research interests include mental health and cancer survivorship, as well as epidemiological aspects of urologic malignancies.
